

A virtual care management application to keep care teams connected with their patients before and after surgery.

Not actual patients

mymobility® equips health care providers with a digital platform for pre- and postoperative care management, delivered prior to surgery and up to 365 days post surgery. It is designed to optimally prepare and support knee and hip patients along the entire continuum of care – anytime and anywhere.

It offers education, video-guided exercise preparation and rehabilitation programs, direct video, picture and text-based messaging through a patient app and clinician web-portal.

The mymobility® platform will be available in two different subscription models:

mymobility® LE

- Timely limited offer
- Remote and rapid implementation
- Unlimited patients and surgeons
- Wide range of standard exercises for Hip & Knee replacement
- Flat fee

mymobility® with Apple Watch

- Unlimited in time
- Unlimited patients and surgeons
- Ability to customize care pathways and exercises
- Access to Apple Watch fulfillment
- Access to customer service hotline
- OrthoIntel-ready
- Annual license fee

mymobility® and mymobility® LE are available on iOS and Android devices.
